

MEL -  - CREAM® DONUTS

... Setting the standard in donuts since 1932!

January 27, 2006

Dear Valued Customer:

The Food Allergen Labeling and Consumer Protection Act of 2004 has gone into effect on January 1, 2006. Mel-O-Cream® Donuts International, Inc. is pleased to make available to you upon request updated allergen information sheets for the products we sell you. These sheets will alert you to the allergens in our manufacturing system as well as those contained within our raw materials. We hope that you will find this information useful in your compliance program.

Our allergen information sheets will list the presence of the “Big Eight” allergens (wheat, soy, egg, milk, peanuts, tree nuts, shellfish, and fish) as well as several other ingredients that are often asked about from our customers: celery, corn, mustard, pine nuts, sesame seeds, sulfates, and “other glutens”.

All donut products produced at Mel-O-Cream® Donuts International, Inc. contain the following generally recognized “Big Eight allergen ingredients: Wheat, Soy, Milk, and Egg.

These ingredients are listed on the ingredients list on the products cases and a statement of allergens is also present on the label. If additional information is needed or to request allergen information sheets, please contact Chad Larson or Dana Starks at Mel-O-Cream® Donuts International, Inc.
