

# SUGARED DONUTS

1.) Place frozen donuts on parchment lined pan. Make sure you have the best side facing up. Allow them to thaw for 30 - 45 minutes.

2.) Powdered donuts do **NOT** go in oven. Sugared and cinnamon & sugar donuts should be put in the oven at 350 for 60 seconds. Then sugared while they're still warm.

3.) Sugar the warm donuts IMMEDIATELY so the sugar will adhere. Put your donuts in the sugar mixture.

4.) Toss the donuts in the sugar to make sure it is completely covered in sugar and place back on tray.

5.) Toss the donuts in the powdered sugar to make sure it is completely covered in sugar and place back on tray.

6.) Place donuts on black tray and place in pastry case. Make sure you place it with the correct descriptor card.
